

I enjoy XM radio and most music is free from selling junk. I do wish the Disk jock would play more music and not talk so much.  
I can find no reason that XM would be band You play for valid satalight and we relieve it directly from satalite. FCC would have to also ban TV dishes.

Any FM or AM station can drop commercials and do what you do. We pay a honest fee and you pay a honest fee for Sat time.

The panic is more fear from Satalite phones then am fm. Sat plhone have dropped from 6.80 to about 2 dollars and the Sat phone people are going nuts. They want to raise there rates. Oh Well when they give service and a real price they will go back to selling sat phones. Why pick on XM
